

Joshua Christianto

Education

SMK Bonavita

2013 - 2016

Multimedia Major

Universitas Buddhi Dharma

2016 – 2020

Informatics Engineering Database Major GPA 3.63

My Bachelor Thesis about "Implementation of Text Mining for Comment Analysis of YouTube Channels Using Naïve Bayes Classifier"

About Me

My Name is Joshua Christianto. I am a fresh graduate student with a degree/Bachelor of Information Engineering major. I want to sharpen my programming skill, and becoming a web developer.

Experience

September 18th, 2019 – December 31st, 2019

Intern • Web Programmer • Lippo Karawaci Tbk

designing, developing and assisting in the development of a website program that will be used for booking funeral plants for the San Diego Hills sub-company

Projects

Dummy Web Loruki—Heroku-alike web interface. I using only HTML, CSS, and JavaScript for layout, and git for version control. Then I use netlify to host it and using form service to get users' messages.

CoderDev Hub—My self-learning project. This is a social media app that specialized for anyone with IT background, either hobbyist or professional to having a chat. I make it using MERN-stack, the database itself using MongoDB Atlas and host it with Netlify.

Hobby

Gaming, Listening Musics, Coding, Reading Books, Cardio, Eating
